

FINLAND'S NATIONAL VOCATION

- FINNISH NETWORK

www.fin-nv.fi

FINLAND, IN GOD'S WILL, NEWLY NETWORKED, BRINGS GLORY TO GOD

THE PEOPLE OF FINLAND, WHO BELIEVE IN GOD, DO GOD'S WILL, ALSO BY BUILDING A NEW KIND OF SUPPORT NETWORK IN THEIR MIDST, WHICH IS CONTRIBUTING TO THE WELL-BEING OF THE ENTIRE NATION.

FINNISH NETWORK

FINLAND'S NETWORKING, GOD WILLING

God has seen to it that the many kinds of brokenness and bad functioning that currently exist in Finnish society will quickly be brought to a new position where the whole of Finland and also communities of Finns elsewhere will please God.

Here, only a few points about Finland's future change are brought out, but God's Holy Spirit expands the matter, when the believers come into the matter, when the Holy Spirit begins to work for them, in the matter.

In recent decades, in Finnish society, there has been an increasing number of families moving away from the proximity of their still-living parents and relatives.

*Suomen "uus-
verkostoiduttua",
Jumalan
tahdossa,
läheisiä on
myös lähellä,
arkipäivässä.*

This thing has inevitably changed our society in many ways and not always in the best direction.

The thing is having an effect, on a physical, mental and spiritual level, regardless of age, in many people's lives, including very negative things that can be even irreparable by current means.

God has pointed out that being away from families, close relatives and acquaintances, from their everyday, important interaction, must be made whole again in a new way, so that people can be as good as possible in all aspects of their lives.

THE CURRENT STATE OF FINLAND > VERY BAD

With families these days, for the most part, children do not interact with their grandparents in their daily lives, for many reasons. At that time, what is missing is an interaction that transcends one generation, which would be beneficial in many ways for both parties.

Also, parents of families, separated from the close interaction of their own parents, miss out on many good things.

If we think about the times we are living in now, it is clearly visible that the family, and in our case the nuclear family as the last one, is only ever worse and worse. The use of drugs, the increase in crime, the increase in abortions, the increase in divorces and promiscuous sex relationships are, for example, punishment for our country's long-standing undermining of Christian values.

If we remove Christianity from our midst, that space will not be filled with other, > evil. You can't sow destruction and expect to reap peace and success, etc.

After Finland is reformed, great honor and praise to the Living God will follow.

I would like the time that has already come when it is God's time to change the direction of Finland, so that the whole of Finland as a nation can experience how, by God, it is "clothed in a completely new", state, our people to serve the Living God together.

It has been known that the way of Finland, as a nation used by God, will bring great, great honor and thanks to the Living God, and it can be seen that the way of Finland must go to a state where its destruction, humanly speaking, is completely certain. When I see, things are finally in place for Finland, then God will lift our country and our people out of destruction with power, and at the same time God will also do the work so that we turn to Him, as a nation.

FINLAND'S NEW PROSPECTS

It is God's will that after all the people of Finland come into contact with God, the "kinship of people" changes so that, in the case of Finnish families and clans, the connection is not determined, anymore, only by biological ties.

When, in practice, almost the entire Finnish people are serving God, it will cause Finland to "network" again, God's will.

The effect of that new state, for the Finnish people, is quite revolutionary, when it comes to the nation's all-round well-being, we as a nation can do really well, "from baby to baby", "from relative to non-relative", the former is just a bad memory of the past.

The life of the new Finland will be rebuilt in such a way that, even if the families are far from their biological parents and grandparents, you will bring them into contact with local older people, they, in the new "normal" family relationship, will begin an interaction that, for the most part, not displacing biological relationships, will give a new for those involved in the relationship, the same opportunities that biological relatives have in intercourse.

In God's order, the Finnish people are healthy, in a new extended family.

There are completely limitless possibilities, once Finland is re-networked, our people will become whole and stronger in many ways. In the future, in the case of Finland, things will be found that will revolutionize our society, it will become stronger and richer, in many, different ways.

When Finland is completely God's own, it is not a strange thing that families, parents and children "find" local people, "new" parents and grandparents, to fulfill their daily life, close human relationships and likewise the local "grandparents" also get, for them, complementary interpersonal relationships, about the parents and children of families who have moved in the community.

"New" parents and grandparents do not replace biological relationships, but in many ways complement and enrich the lives of family members who have moved to the community and local parents, the elderly.

In addition to the increase in mental, spiritual and physical well-being, it will also bring financial savings, as many of the actions that society invests in now will become unnecessary, in the Loving will of God.

EXAMPLES OF THE MATTER "IRON WIRE" ETC.

Finland's new network, the people's families e.g. THEY KNOW THEY ARE IN THE RIGHT BODY, through God's best plan.

Let's think about the situations where family members are in their daily lives, without the daily interaction of the family's biological grandparents, families are not at their best. There is a great danger that the children and parents of families drift, in many ways, away from a healthy life.

In the case of our children and young people, mental health problems are increasing strongly, and one of the root causes is the "rootlessness" of families, in their everyday life, in real time, every day.

In the current state of society, it is easy to bring evil with lies, destructive things into the lives of

our children and young people, when they are broken in many ways, while our society is really bad. Today's world is "sensitive" and hurtful and tells our children and young people that they are "born in the wrong body".

In the new, Finnish situation, the state of the entire nation, is to be e.g. completely satisfied with their physical being, as men and women, girls and boys.

"LAP HOURS"

God has raised in Brother J.'s mind, an element that is now missing in our society, that, in the future, to be an everyday, important part of the life of a well-functioning society.

We, humans, created by God, have been given the largest organ, our skin, for example, that when we touch it, the caring touch of a loved one, in many ways, brings well-being, etc.

We, in Finland, have clubs, daycare clubs, school situations, etc., which in the future can, quite naturally, include the presence of biological and newly networked "grandparents" as part of their daily activities.

In the weekly program of schools, daycare centers, etc., there would permanently be hours and periods where there would be "grandparents" and children's "cuddle hours", where there would be closeness and conversation and touching with mutual interaction, the child and "grandparent" in the assembly.

There are endless possibilities for the issue, to develop forward, children and "grandparents" can, as best as possible, the issue is widely reflected in the well-being of families. "Grandparents" can be biological grandparents, great-grandparents who have their children's families somewhere further away, or even childless older persons.

Networked "grandparents" also get good things in many ways, when they can be e.g. in connection with children's biological parents and grandparents, to tell them what they have experienced as networked grandparents", etc.

The good aspects of the matter could be continued indefinitely, such a good thing of God has also been highlighted here. Let God's Holy Spirit do the further opening for the website visitor, building the "big picture", what the matter is for him personally, in all of God's will.

Jesus knows how important it is for children to also be in a close relationship with older generations and people.

GOD'S WILL IN SOCIETY, SAVE

Also in this present matter, living according to God's will, makes people, in all things, the best.

When it comes to this, there will also be big savings, when in the future, many functions that are now in society will no longer be needed, the people of Finland, living in God's will, will be healthy and whole, in God.

When the people of Finland live in connection with God, numerous things, professions, practices, events, thought structures, etc., will be removed from Finland, from its society, which in their current state have been able to go wrong in various ways, taking up people's time and attracting their attention and taking their wealth to not so good things.

*Society,
following
God's
instructions,
is also
prosperous,
in addition to
other
prosperity.*

A society living in God is in harmony, which is not without influence, in its everyday life, in numerous different ways, really positively.

The integration of the Finnish people, as a matter of fact, is also affecting other peoples, here among us, in a very positive way.

It is known that our society is e.g. distorted in the fact that there are an unnecessary number of white-collar workers of various bureaucracies, when even less would be enough for those who do productive work. There is also a healthy solution to this in God's order.

In the case of Finnish children and young people, in the future, new, healthy, functioning "grandparent relationships" will have dramatic, good effects, of which even real grandparents will not be missing, in God's Loving will.

FINLAND, RE-NETWORKING, LIVES POWERFULLY IN GOD'S WILL.
